

Goal: Address health disparities by promoting a better understanding of community assets, health conditions, and health status within Pima County					
Objective 1: Increase accessibility to health disparities and community assets data in Pima County by 2017					
Strategy 1: Research and assess available public health data as well as other data systems (such as census data and behavioral health data systems)					
Tactics/Activities	Responsible Person(s)	Expected Outcome(s)	Expected Completion Date(s)	Progress Update	Results and Achievements
1.1 Work with local and state health departments to identify sources of public health data	HE Group	Expanded network to enhance access to data.	December 2014  Housing Focus – Progress reported up to March 2015  Housing Focus – ongoing through December 2016	<ul style="list-style-type: none"> <li>• Regular contact with PCHD Director and key department staff</li> <li>• Initiated contact with PCHD Epi department</li> <li>• Identified domains/areas of interest: Education, housing, Income/Poverty, Public Infrastructure, Geography, Trauma</li> <li>• Contact initiated with ADHS-Disability Office</li> <li>• Contact initiated to access data for Arizona Vocational Rehabilitation Program</li> <li>• Established connection with PC Housing Department</li> <li>• Established connection with Corky Poster for information gathering related to transportation, housing, planning</li> </ul>	<ul style="list-style-type: none"> <li>• Strong partnership with PC Departments of Health and Community Development</li> <li>• Consensus among stakeholders as to what data should be the focus</li> <li>• Consensus that data should lead to identification of research and policy questions that can be investigated through funding opportunities</li> <li>• Consensus that housing, transportation, and other opportunities will be the group's focus in 2015-2016</li> </ul>

				<ul style="list-style-type: none"> <li>Selected focus of HOUSING as area of interest for data collection</li> <li>Acquisition of housing stock data for Pima Cty from Pima County Community Development</li> <li>Development of initiative to use GIS mapping approach to identify areas with poor housing stock and opportunities</li> </ul>	
1.2 Create resource and inventory list of available public health data	HE Group	Inventory of relevant sources of health and social data.	December 2014  Housing Focus – ongoing through December 2016	Minutes reflect documentation of data sources.	Several indicators related to housing, economic opportunities, transportation, and health outcomes, have been mapped
1.3 Disseminate resource and inventory list to community partners and stakeholders	HE Group	Continuing distribution of resource lists and links.	December 2014  Housing Focus – ongoing through December 2016	Healthy Pima communication list contains multiple resources.	Weekly Healthy Pima newsletter. Healthy Pima partners have greater awareness of and access to relevant data and resources.
1.4 Hold forums with community partners and stakeholders to identify gaps in available public health data	This Activity is combined with the community forum activity held to increase awareness around the social determinants of health.				
1.5 Develop strategies for	HE Group		January 2014 – March	Members' work on Op-Ed	Strategies and

addressing gaps in available public health data			2014  Housing Focus – ongoing through December 2016	writing projects to advocate for more access to data and greater utilization of existing data to inform public policy  Development of partnership/collaboration with other PC Departments such as Community Development	resulting data are shared with community partners group, researchers, and decision makers.

Goal:	Address health disparities by promoting a better understanding of community assets, health conditions, and health status within Pima County				
Objective 1:	Increase accessibility to health disparities and community assets data in Pima County by 2017				
Strategy 2:	Study feasibility of creating an academic-public partnership to collect, monitor, use, and report data on community assets and health disparities that exist within Pima County				
Tactics/Activities	Responsible Person(s)	Expected Outcome(s)	Expected Completion Date(s)	Progress Update	Results and Achievements
2.1 Identify academic and public institutions willing to invest in a partnership around community assets and health disparities	HE group	Identification of potential partnerships.	June 2014 – December 2014  Housing Focus – ongoing through December 2016	Initiated engagement with Health Plans (Health Choice) to discuss pilot project  Partnered with Community Food Bank of Southern Arizona and engaged public health epi student to work with group	Public health epi produced County profile maps of health, economic, and food security indicators, completed May 2015, published August 2015

				<p>around data analysis and GIS mapping, using demographic, health, and food security indicators for Pima County and other southeastern Arizona counties.</p> <p>Plan to target health care providers with analysis and takeaways.</p>	
2.2 Research models for an academic-public health partnership	<p>There will be an ongoing flow of public health students available to the Health Equity/Healthy Pima group via the VOPH internship program as well as the UA Canyon Ranch Center for Prevention and Health Promotion’s partnership with the Community Food Bank and others. The internships and other models of relationships that exist between the UA, Pima County departments, and the non-profit sector, are multiple and vary per available funding, research and evaluation projects, policy development, and other exchange. Our group has reached a consensus that it is not practical to attempt to oversee or direct this organic and evolving environment, when there are already many people and groups who are activity invested in building and sustaining these relationships./</p>				
2.3 Hold forums to discuss the creation of an academic-public health community assets and health disparities partnership	See 2.2				
2.4 Determine components necessary for implementing an academic-public community assets and health disparities partnership	See 2.2				
2.5 Develop recommendations on creating a sustainable data sharing infrastructure	See 2.2				
2.6 Research funding opportunities to support an	See 2.2				

academic-public health partnership

**Goal:** Address health disparities by promoting a better understanding of community assets, health conditions, and health status within Pima County

**Objective 2:** Facilitate inclusion of health disparities and community assets data in surveillance, priority setting, and action planning in Pima County by 2017

**Strategy 1:** Describe health disparities and community assets as well as social and structural factors within Pima County, including behavioral health

Tactics/Activities	Responsible Person(s)	Expected Outcome(s)	Expected Completion Date(s)	Progress Update	Results and Achievements
1.1 Synthesize available public health data with other data systems	HE group	This strategy is more an overall directive for the Health Equity group, and the group’s consensus has been to move away from producing formal analyses and reports, and instead to leverage collaborative networks to support group members to include a health equity perspective in their own products.			
1.2 Produce analysis of community assets and disparities in health conditions and health status data					
1.3 Prepare report describing community assets and health disparities in Pima County					
1.4 Disseminate community assets and health disparities information to stakeholders, health coalitions and grassroots groups, and jurisdictional officials					
		For example, during this reporting period, members’ products include: County profile report on food security safety net (CRCPHP), Op-Ed articles on disability justice, Fair housing and economic development.			
		In future work plans, we will be identifying specific initiatives and projects that will “Describe health disparities and community assets as well as social and structural factors within Pima County, including behavioral health” as the default in relation to the specific initiative.			

Goal:	Address health disparities by promoting a better understanding of community assets, health conditions, and health status within Pima County				
Objective 2:	Facilitate inclusion of health disparities and community assets data in surveillance, priority setting, and action planning in Pima County by 2017				
Strategy 2:	Engage stakeholders, health coalitions and grassroots groups, and jurisdictional officials in data sharing and interpretation				
Tactics/Activities	Responsible Person(s)	Expected Outcome(s)	Expected Completion Date(s)	Progress Update	Results and Achievements
<p>2.1 Hold forums with stakeholders, coalitions, grassroots groups, and jurisdictional officials to:</p> <ul style="list-style-type: none"> <li>•Discuss quality and usefulness of community assets and health disparities data</li> <li>•Describe the social determinants that drive health disparities</li> <li>•Discuss policies, such as the ACA, that impact health disparities</li> <li>•Identify priorities for action</li> <li>•Develop community engagement efforts around Unnatural Causes documentary series</li> </ul> <p>HE Group/tbd Jen Peters</p>	HE group	Forums HE Meetings	<p>March 2014</p> <p>Ongoing through December 2016</p>	<p>Core presentation developed by JP/MC and reviewed by committee</p> <p>“Community Conversation on Health Equity” held in Tucson, April 10, 2014 as part of NPHW</p> <p>Presentation to Healthy Pima on Social Determinants of Health</p> <p>Presentation to Arizona Dietetics Association on Social Determinants of Health</p> <p>Monthly (10 annually)</p>	<p>Health Equity group is positioned to be a convener of stakeholders, health coalitions and grassroots groups, and jurisdictional officials to discuss health equity issues, as well as form consortiums to funding opportunities that will serve to improve the availability of high quality data</p>

				Health Equity membership meetings where stakeholders, health coalitions and grassroots groups were engaged in discussion of health equity issues including the need for access to data.	
2.2 Develop a system for communicating issues and recommendations around addressing health disparities and strengthening community assets in Pima County <ul style="list-style-type: none"> <li>List serve</li> </ul>	HE Group Healthy Pima	Listserv	January 2014	Done. Healthy Pima communication list and newsletter serves as a vehicle for disseminating information.  HE members are engaged in Op-Ed projects.	HE group is a contributor to the HP communication list  Op-Ed pieces on health equity issues are developed and published in major news outlets.

<b>Goal:</b>	Address health disparities by promoting a better understanding of community assets, health conditions, and health status within Pima County				
<b>Objective 2:</b>	Facilitate inclusion on health disparities and community assets data in surveillance, priority setting, and action planning in Pima County by 2017				
<b>Strategy 3:</b>	Advocate for the use of health disparities and community assets data in priority setting and action planning				
<b>Tactics/Activities</b>	<b>Responsible Person(s)</b>	<b>Expected Outcome(s)</b>	<b>Expected Completion Date(s)</b>	<b>Progress Update</b>	<b>Results and Achievements</b>
3.1 Work with jurisdictional officials to incorporate community assets and health disparities data into comprehensive planning	HE Group	Identify opportunities to conduct a Health Impact Assessment, Community Needs Assessment, or other planning tool.	October 2014 – December 2014  Place Matters – December 2016	Contributed to the recent PC CHNA  Consideration of the Place Matters multi-sectorial coalition program from the	Prioritization of multi-sectorial approach to leadership and collaboration serves to address the need for better coordination and communication

<p>3.2 Work with health coalitions to incorporate community assets and health disparities data into priority setting and community planning efforts</p>	<p>HE Group</p>	<p>HE Co-chair is a member of 4-person Healthy Pima team with a National Leadership Academy on the Public's Health fellowship</p>	<p>October 2014 – December 2014  April 2014  December 2015</p>	<p>Public Health Policy Institute</p> <p>Initiated and completed project with Community Food Bank of Southern Arizona to contribute to comprehensive community needs assessment of food security in the context of health, housing, and employment.</p> <p>HE Co-chair is a member of 4-person Healthy Pima team with a National Leadership Academy on the Public's Health fellowship</p>	<p>among public agencies, academia, and NGOs. This will lead to greater impact of initiatives related to health equity and addressing the social determinants of health.</p>
